

Hello and welcome,

My name is *Dean Samuels* from Silicon Valley CIO. We provide engagement-based CIO leadership & IT management services including technology transformation projects, cloud migrations, and strategic business initiatives.

These days, progressive businesses must *embrace change* in order to remain competitive. Transformations can include disruptive phases such as: start-ups, rapid growth, management turn-arounds, new business models, new products & services, market expansion, globalization, and M&A. Any such business undergoing revolutionary change must engage experienced CIO leadership to guarantee success.

We believe that every business (regardless of size) deserves CIO leadership – to leverage technology in creative ways to grow business, increase employee productivity, enable “informed” decisions, and deliver loyalty-inducing customer experiences.

I love the work I do, and especially enjoy partnering with visionary CEO's and their talented management teams. I'm passionate about wise technology decisions that make business growth happen & transformation possible, provide best-in-class workplace tools, and delight customers.

To learn more about Silicon Valley CIO and my CIO leadership experience, please view my introduction letter:

I like to listen and learn from people who are passionate about their business dreams, ideas, challenges, and opportunities. I would enjoy further conversation with you and your colleagues to discuss your vision and business goals.

It would be my pleasure to have a conversation with you about your business:

Call **(650) 488-4CIO** *office*

I look forward to speaking with you soon,

Thank you -- *Dean*
